Improve Your Life

Manual for RE Room Energizer

05 -2012

One Product – two applications

ROOM ENERGIZER – More personal energy

Everybody would like to have more energy to face the daily challenges in life and handle them with ease. Good sleep, healthy food and water and working out, as well as mental stability contribute to a better condition. But even with all that, there are those who still feel a lack of energy or would like to see their energy level on a higher level.

Pharmaceutical products, all sorts of legal and illegal drugs, alcohol, stimulating energy drinks and questionable substances do not stimulate the energy level in a healthy way without side effects. Even the average vitamins are not true, full vitamins and do not help in many cases. Many people using the above still feel fatigue and a lack of energy.

IPC has successfully developed a product, which without any side effects, energizes your body through its EUPHORIA TECHNOLOGY™ to overcome fatigue.

Placing a minimum of one ROOM ENERGIZER in your office, living room and / or work out room energizes your body through EUPHORIA TECHNOLOGY™. Placing up to 3 in a regular size room, increases the results substantially.

Being well energized results in experiencing less over all fatigue, being able to physically working longer, having less recovery time when physically working hard or from work out exercises.

ROOM ENERGIZER – Better sleep

Many people truly wish for a good night's sleep, waking up next morning and feeling fit to meet the challenges of the day to come.

However, many of us wake up next morning feeling drowsy, still tired without a feeling of having had deep restful sleep.

One could define healthy sleep as sleep of not less than 6 hours of uninterrupted sleep, while some people may be in need of up to 8 hours of uninterrupted sleep. Healthy sleep is needed for the body to recover from the challenge and stress of our daily life and to revitalize for the next day to come.

Many more people than we can imagine do not have this uninterrupted, badly needed sleep. Many take questionable types of pharmaceutical products, all sorts of legal and illegal drugs to get themselves some sleep. Many of these products, or most likely all, have side effects which are usually harmful or even lead people into a dependency which is physically and mentally dangerous to say the least. Even so, these products often do not get the results needed and they do not support an allover good condition in health.

IPC has successfully developed a product, which without any side effects, energizes your body through its EUPHORIA TECHNOLOGY™ to overcome fatigue and unrestful, sleepless nights for most of the users, if the sleeping problems are related to a physical condition.

Placing a minimum of one ROOM ENERGIZER in your bedroom energizes your body through EUPHORIA TECHNOLOGY™. Placing up to 3 increases the results substantially.

Being well energized through healthy sleep results in experiencing less over all fatigue during the day, being able to physically working longer, having less recovery time when physically working hard or from work out exercises.

General information

The RE ROOM ENERGIZER has been developed to improve personal energy level. The ROOM ENERGIZER was developed by AER (Audio Engineering Research) – a division of IPC. Please visit www.roomenergizer.com

Key Product Benefits

- Promotes the blood and lymphatic microcirculation without increasing blood pressure
- Increases breathing efficiency
- Improves performance in sports and all physically strenuous activities
- Encourages faster reaction and better body balance
- Promotes longer periods of uninterrupted sleep

What if you have

- improved microcirculation to improve your health
 - less fatigue
 - improved ability to work harder and longer
 - improved microcirculation for physically demanding activities
 - longer periods of uninterrupted sleep
- ... all from just positioning one or multiple ROOM ENERGIZER in your room.

Applications

For every day activities, without any particular demand.

For physically strenuous activities such as sports and demanding work activities.

For better sleep due to physical problems related to the body.

Directions for use

1. Simply place one ROOM ENERGIZER on the floor of your average sized work out room, living room, office etc.
2. Switch on the toggle switch at the bottom of the unit. A green blinking light will indicate the device is operating.
3. Switch off after use, or periods of longer absence, to extend battery life.
4. More ROOM ENERGIZERS (3 and more) create bigger effects.
5. Arrange ROOM ENERGIZERS, if you use 3 or more, to create a triangle in their position to each other.
6. Very large sized rooms may need more ROOM ENERGIZERS.

How the ROOM ENERGIZER works

The PVA Field (Proton Vibration Alignment Field) generated by the ROOM ENERGIZER promotes the blood and lymphatic microcirculation of the entire body. It effectuates the micro-phase alignment of protons of the air inside the room and consequently of the entire body, which leads to greater blood flow, without increasing the blood pressure. Consequently, various metabolic and biological functions are significantly improved, which in turn increases breathing efficiency, endurance, stamina and the overall balance of the body. As a direct result, users can handle the every day demand for the body, physical performance, sports performance and other energy-intensive activities far more easily.

EUPHORIA TECHNOLOGY™

IPC's proprietary Euphoria Technology™ is implemented in all IPC products to generate a prescribed and stable PVA Field (Proton Vibration Alignment Field).

An atom has three major particles, namely Protons, Electrons and Neutrons. The PVA Field created by Euphoria Technology™ aligns the vibration and movement of protons and electrons in all matter so that their physical properties are fundamentally enhanced.

Euphoria Technology™ is based on quantum mechanics operating on the scale of picometers, i.e., picotechnology. Picotechnology refers to the manipulation of matter on the scale of trillionths of a meter (10^{-12} m), and is much more advanced than traditional nanotechnology. Euphoria Technology™ was invented by IPC and has been successfully applied to products in different industries.

Comparison

If you want to conduct a before and after comparison using the ROOM ERNERGIZERS please proceed as follows: First leave the units switch off. Proceed with some work out excersises which lead you to your threshold, to your limits. Now switch on the ROOM ENERGIZERS and repeat the same excersises. You will surely notice major improvements.

The comparison test must always be conducted by doing the test run first without and then with ROOM ENERGIZERS switched on. Below is the explanation why.

You need to know

After the ROOM ENERGIZERS have been switched off, the positive effect may still linger for some time until a full reversion has taken place. Depending on the length of time the ROOM ENERGIZERS were switched on, the positive effect on people may last either seconds, minutes, hours or even days. There are no fixed rules.

FEATURES

Power on/off switch

Simple operation

Battery powered - with power indicator, guaranteed for 4 years

Compact size

Portable and freely positionable

Fast and simple placement - no installation needed

No maintenance required

Specifications

Dimension (HxWxD): 300 x 120 x 120 mm 11.8" x 4.7" x 4.7"

Weight: 1.3 kg / 2.9 lbs

Power: Built-in

Expected product lifetime: 4 years from the date of manufacture.

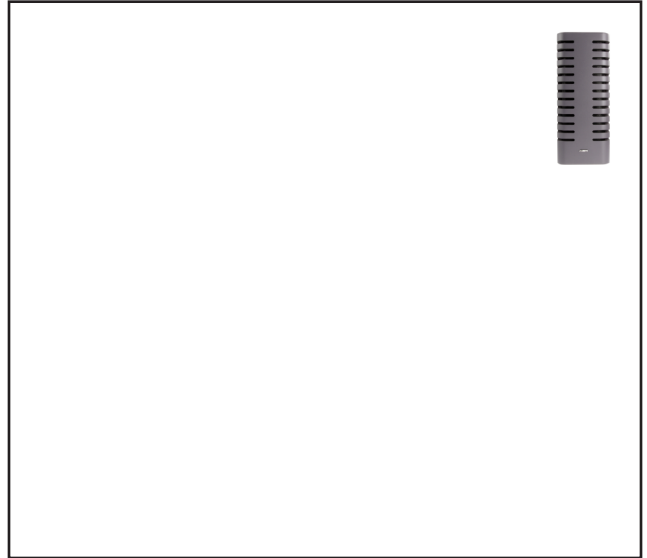

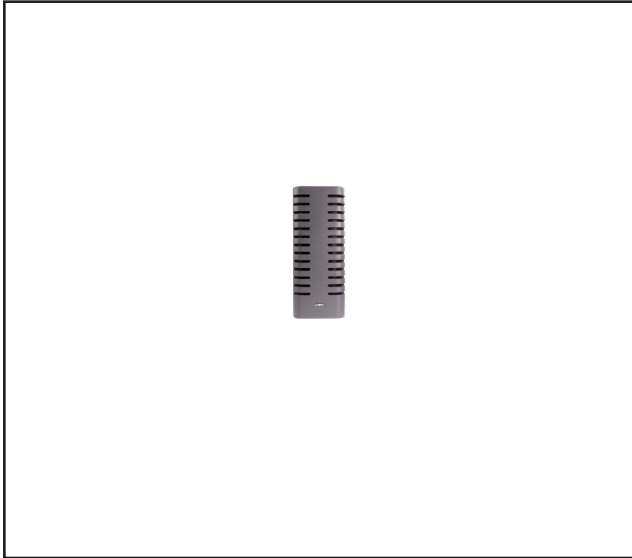

The flashing green light at the top indicates the unit is working.

Warranty: 1 year

Proposed positioning for 1 ROOM ENERGIZER

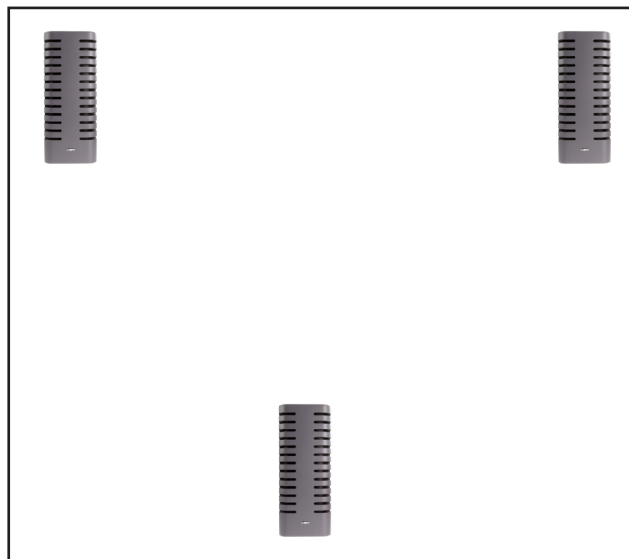

If possible, place one ROOM ENERGIZER in the center of the room on the floor.

If a center spot is not available or obstructive, use any other location.

Proposed positioning for 3 ROOM ENERGIZERS

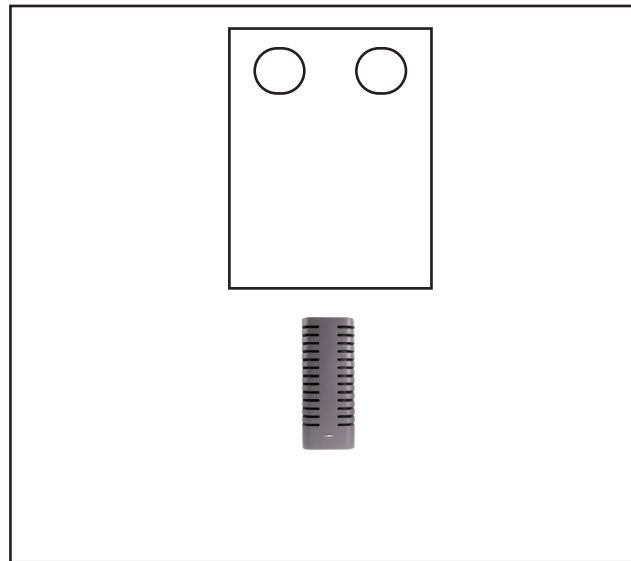

Place three ROOM ENERGIZERS on the floor to form a triangle around the people in the room.

Bedroom - Proposed positioning for 1 ROOM ENERGIZER

If possible place one ROOM ENERGIZER at the end of the bed on the floor.

If a center spot is not available or obstructive, use any other location.

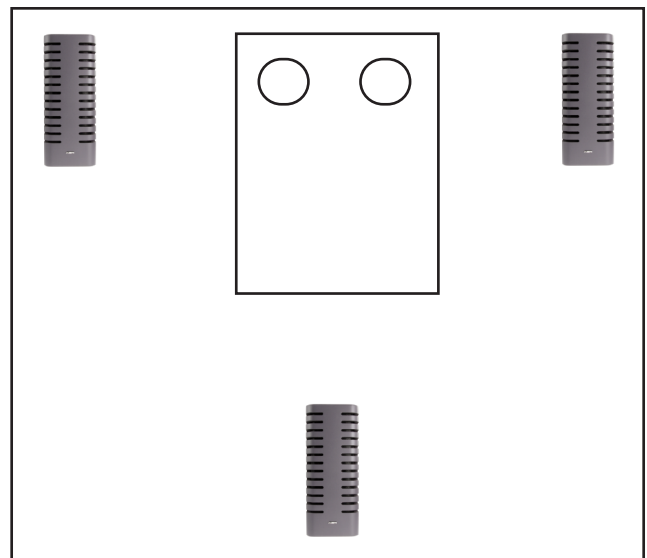

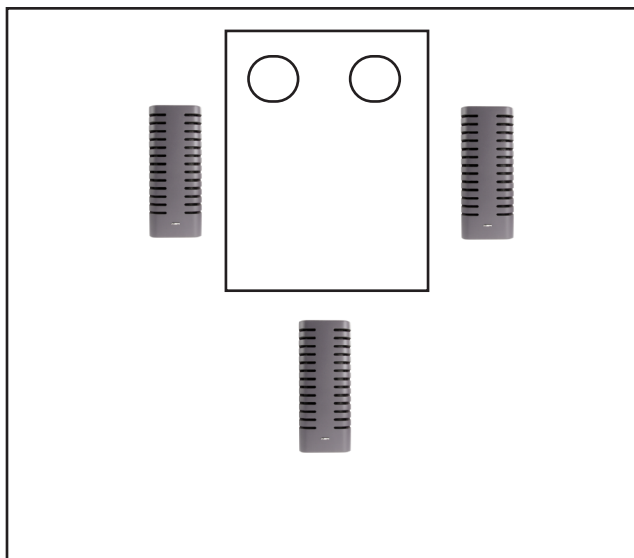

Bedroom - Proposed positioning for 3 ROOM ENERGIZERS

It is important that the 3 units form a triangle.

If possible place one ROOM ENERGIZER at the end of the bed on the floor.

Place the other 2 units left and right of the bed, next to the bed or at the wall. Start to position the 2 left and right below your head level first, then over a period of a few days move them further up towards or above your head level. Find the position in which you experience the best sleep which can be different from person to person.

Product Information

Please review the following information carefully for the proper use of ROOM ERNERGIZERS.

Caution:

Do not clean the unit with benzene, paint thinner, alcohol or any other solvent.

Do not expose to direct sunlight or excessive heat.

Do not drop, hit or otherwise abuse the unit.

Do not expose to any liquid.

Replacing Batteries

Once the battery life of the product has expired, the LED light does not come on anymore. At this time, the batteries can not be replaced. When the batteries have expired, please contact IPC or its local representation for possible trade in offers of your used product toward buying any successor model.

Storage

Store ROOM ERNERGIZERS in a cool, dry place away from direct sunlight.

Warranty

Innoworks Product Creation Ltd (IPC) warrants the ROOM ERNERGIZERS to be free from defects in material and workmanship during the 4-year warranty period starting from the date of purchase. Customer should present the original invoice with the date of purchase, product serial number and the authorized dealer's seal to qualify for warranty repair service including free parts and labor within the warranty period.

Important: The warranty shall become void if the ROOM ERNERGIZER is damaged or defective as a result of misuse, abuse, alteration, contamination, tampering, unauthorized maintenance or failure of the purchaser to follow normal operating procedures outlined in the user manual. In cases where the customer has chosen a representative not appointed or authorized by IPC for repair services, the product warranty shall be void immediately. The warranty is voided if the user opens the housing of the ROOM ERNERGIZER.

DISCLAIMER

IPC endeavours to ensure that all the information contained in this user manual is accurate and up to date, though assumes no liability or responsibility for any errors or omissions herein, which is subject to correction without prior notification. IPC hereby accepts no liability for any alleged harm resulting from the use or misuse of ROOM ERNERGIZERS, and/or any losses incurred through the use of it by any method other than that outlined in this user manual or on the product packaging and flyer. This user manual must not be duplicated or translated in any other languages or format without obtaining formal written authorization from IPC.
